

Template for Hydrangea Petals

- 4 petals per flower.
- Fold wafer paper in half and cut 2 petals out at a time.
- You can use a universal leaf to made some leaves.
- To condition your wafer paper there are a few ways depending you your weather and humidity levels. I used the same conditioner as Anna from and my templates are based on hers too. If your weather is very humid you can make your conditioner with alcohol and water.
- 2:1 Alcohol : Glycerin (Food Grade) or 4:1 Water : Glycerin
